

ProcessWizard becomes the latest eKNOWtion Enabler

eKNOWtion is pleased to announce its new partnership with ProcessWizard– the developer of this industry-leading Business Process Management tool. Now in use by major multinationals across the globe, ProcessWizard is a powerful tool which beyond other things automates the Supply Chain Councils SCOR Model - and then puts it to work in your business, enabling companies to develop a clear supply chain management roadmap. The new version of this ProcessWizard also adds in critical design and customer process elements.

“Having worked with companies for many years implementing SCOR to drive supply chain excellence, we recognised the need for a tool which could help to ease the pain and put our clients on the fast-track to improvement” says eKNOWtion co-Director, Douglas Kent. “ProcessWizard has proven that using this highly automated tool helps companies achieve results in a quarter of the time and with twice the value – this is the level of ROI that we demand from our Enablers and helps us deliver our promise to *Unlock Performance* at our clients.”

“Experience and focus on designing and implementing supply chain solutions was an important factor in selecting eKNOWtion” says ProcessWizard’s, Mark Simon. “eKNOWtion is one of only a handful of consultancies worldwide with a certified SCOR trainer and we share the same goals with our clients - drive substantial and sustainable supply chain improvement quickly”.
